Promotion gap is alarming

Only 2.1% of employees were promoted in 5 years. Leavers had 5x lower promotion rate (0.5%) than stayers (2.6%). Career stagnation is a key driver.

Overwork is real

Employees who left averaged 207 hours/month. Burnout cases (7 projects) saw 100% attrition. Standard expectation should be capped.

Work accidents linked to retention

Employees who stayed had 17.5% accident rate vs only 4.7% for leavers — suggesting leavers may be disengaged even before exit.

29.7%
of low-salary employees left — 4.5x higher than high-salary peers (6.6%)

100%
of employees with 7 projects left. Overloading is the strongest single attrition predictor

5.9%
attrition among promoted employees vs 24.2% without — promotion is the #1 retention lever

0%
attrition for 7–10 year veterans — loyalty solidifies after the 6-year mark

26.1%
of employees who left had high satisfaction (>0.7) — they left for growth, not unhappiness

56.6%
of 5-year tenure employees left — the most critical retention window

29.1%
attrition in HR dept — highest of all departments. Cobbler's children have no shoes

0.44
avg satisfaction of those who left vs 0.67 for those who stayed — 34% gap

38.8%
attrition for overworked staff (>250 hours/month) — burnout zone clearly visible
